I. GENERAL ASSESSMENT

(Empty Page)

The content of this Q3-2007 Bulletin is including economic developments and the data of the Central Bank over the months of July, August and September 2007. Whereas, the data on Banking Sector those obtained from the banks, is given over the period of May-August 2007. A general assessment of the Bulletin which consists of five main sections is given below:

- 1. Increase in the CPI (Consumer Prices Index) reached to 7,70% since the beginning of the year.** Inflation rate started to increase in the third quarter contrary to the first two quarters of this year. CPI increased by 4,00% from the second quarter and 7,70% since the beginning of this year. Price increases in the second quarter was explained by the VAT rate adjustments and a result of the additional withholding tax collections from the imports but in the third quarter price changes seem to arise due to the seasonal effects. Both the impacts of global warming on certain agricultural product prices and the opening of school period accelerated the inflation in the last quarter. When the annual trend of the inflation is analyzed it has been observed that the average level of inflation is lower than the last year's same period. Although the inflation made an upward trend contrary to the third quarter of the previous year but the average rates are still below the last year.

When the change in the prices of main groups analyzed, it has been observed that the highest increase occurred in the food and non alcoholic beverages category. Price increases in fresh fruits and vegetables in this period arise from the low rainfall and poor harvest due to global warming in Europe and elsewhere. Specially, the increase in grain prices which inflated the prices of bread and other flour products in August. School openings and an increase in the demand for education materials caused increases in the prices of education product category during this period as well. Historical prices of oil influenced the prices of some chemicals and non-fuel oil derivative products' prices in the same period.

- 2. According to the budget results for the first nine months of this year, total amount of domestic revenues were 1.139,81 million TRY where the total amount of expenditures were 1.391,50 million TRY.** When the total aid and donations are exempted budget has a deficit of equal to 251,69 million TRY. This figure was 265,78 million TRY during the first six months of this year. Although the some tax rates increased during this year but this didn't cause any significant increase in tax revenues, furthermore, serious increases in expenditure items creates fragility in sustaining budget balance. Sustaining fiscal balances considered very important due to its potential threat on macroeconomic balances. Due to this inter linkages in the economy, arrangements of tax rates and other relevant fiscal policies must take all the macroeconomic outputs into consideration rather than focusing only on budgetary balance concerns.

3. Trade deficit according to the last year's first nine months figures remained same in US dollar terms but decreased by 6,60% in terms of Turkish Lira. Total imports during the first nine months were \$1.018,17 million and export figures were only \$64,8 million. With those figures, total trade deficit is \$953,3 million. Value of total imports in terms of dollars increased by 1% compared with the same period of last year, whereas the value in terms of TRY decreased by 5,50%. Since the majority of imports are from Turkey (69,00%), by looking at the New Turkish Lira value of imports it can be said that demand for imports are declining (although the invoicing of some products from Turkey are in Euro or Dollar units). Another indicator of declining import demand can be seen from the import figures of vehicles, value of vehicle imports decreased by 3,00% compared with the same period of last year. Other than vehicles, import values of construction materials such as iron bar, cement and timber remained nearly at 2006 levels where the prices of these products increased in dollar units. These levels may indicate the declining demand for imported construction materials. Items having an increase in their values compared with the same period of 2006 may be due to the international price increases. Specially products such as wheat, corn, feed whose prices affected from poor harvest due to global warming and others such as chemicals and petroleum products whose affected from historical high oil prices.

When the export values are considered for the same period of last year it has been noticed that it increased from 54,5 million US Dollar to 64,8 million US Dollar level. According to these values, total exports increased by 18,80% within a year. Due to the exchange rates not only the dollar value of exports to Turkey increased but the share of exports to Turkey increased as well. According to the first nine months figures citrus and diary product exports took the first row, followed by clothing, metal wastes. Due to the seasonal nature of products like citrus and potatoes whose harvests are completed in early spring impose a limitation to any increase in exports till the end of this year. But with the ongoing exchange rates total value of exports is expected to be over 70,0 million at the end of this year.

- 4. When the total number of arrivals to TRNC and overnights are considered as the main tourism indicators, a little increase may be noticed compared with last two quarter's of this year.** Looking to the total number of passengers, last year was 552,000 passengers where this year reached to 604,000. But when the occupancy rates are considered this year's rates are below last year rates. The reason for this may be the increase in the total bed capacity with the openings of new hotels. Another reason may be the arrivals of some foreigners as land owner and preferring to stay in their properties rather than at touristic hotels.
- 5. A deceleration in increasing trend in volume of the balance-sheet of The Central Bank is continued.** Relatively a lower growth rate of 0,80% in the third quarter is achieved, whereas this rate was 7,30% and 3,00% over the first and second quarters of the year respectively.

6. **The liquid assets, which has the highest share in the balance-sheet is increased by 0,61 points and reached to 88,64% in the total assets.** The item of liquid assets which consists of cash assets, gold, deposits with the banks and securities portfolio, is increased by 17,8 million TRY and reached to 1.188,4 million TRY. This is due to the 5,50% increase in the FX items, despite of a decrease of 1,90% realized in the TRY items.
7. **Total credits residual of public sector and banking sector is realized as 114,9 million TRY, by the end of the third quarter** As a result of collections done, total credits are decreased by 4,4 million TRY in comparison with the end of the previous period. Total arrears of rediscounted credits granted to the banking sector is 5,2 million TRY by the date 30rd September 2007.
8. **As of the end of third quarter, total capital & reserves (profit/loss account excluded) are 95,2 million TRY.** So as a result of this, no significant changes occurred in the portion of capital & reserves in total assets and has risen from 7,06% to 7,10%.
9. **Although the portion of the total deposits item (the sum of public, banks and other deposits) within total liabilities has declined by 1,81 points to 53.09% by the end of September 2007, still keep its characteristic of being the main source of the fund of the Bank.** The portion of banks deposit has decreased by 2,24 points to 90,65% whereas, the portion of public deposit has increased by 1,50 points to 8,49%, in the total deposits. By the end of the third quarter, the amount of total deposits is decreased by 18,2 million TRY and realized as 711,9 million TRY.
10. **Required reserves; the second major fund resource of the Bank has declined 0,82% and realized as 467,9 million TRY.** Within this quarter, the portion of the required reserves of TRY in the total required reserves has increased by 1,69 points and reached to 50,28%. As a consequence of this, reversely to TRY case, the required reserves of FX has decreased by 1,69 points and decreased to 49,72%.
11. **In respect to the end of the August 2007, the total assets of the banking sector has reached to 6,0 billions TRY.** Over the period of May-August 2007, a growth of 4,47% is occurred in the total assets of the sector. The mentioned growth is a consequent of the increases in the items of securities portfolio, required reserves, credits and other assets. By examining with respect to the bank groups, the increase in the total assets of the sector is mainly contributed by 'Private Banks'. The share of the item of claims on banks in the total assets is decreased by 1,35 points and is realized as 23,18% by the end of August 2007.

- 12. A decrease has happened in the liquid assets of the banking sector.** Total amount of the items of, cash assets, Central Bank, claims on banks and securities portfolio those are forming up the liquid assets of the banking sector, has receded from 2.442,8 million TRY to 2.410,6 TRY. Consequently, share of the of the liquid assets in the total assets has decreased by 2,34 points and to set back to 39,89%.
- 13. The share of the gross-credits (sum of credits and past-due loans) in the total assets has increased by 0,31 points.** Gross-credits has increased 124,0 million TRY and reached to 2.478,2 million TRY in total, whereas it was 2.354,2 million TRY by the end of May 2007. Examining the shares in total gross-credits by the bank groups, a decrease in public banks of 1,88%, an increase in private banks and foreign banks branches of 4,39% and 49,13% occurred respectively. According to the types of gross-credits, both TRY and FX cross-credits have increased by 2,99% and 8,56% and reached to 1.432,0 and 1.046,2 million TRY respectively. A shrink in the shares of public sector and other sectors and an expansion in the shares of trade sector and consumer credits has occurred in comparison with the second quarter of the year.
- 14. Although the total deposits of the sector is approximately increased by 3,24% with respect to the end of May 2007, the share of this item in the total sources is decreased by 0,98%.** If the deposits are examined by means of TRY-FX compositions, an increase in both TRY deposits of 4,34% and FX deposits of 2,12% can be observed. In spite of, TRY deposits of all banks' groups have increased, FX deposits of the public banks group are decreased while it is increased for the private banks and foreign banks branches groups. When the deposits are considered by maturity, the changes in the amount of neither sight nor fixed term deposits are negligible.
- 15. By the end of August 2007, capital and reserves have increased.** The share of this item is reached to 9,28% by the end of the August 2007, whereas it was 8,94% at the end of the May 2007. In respect to the end of August 2007, total capital and reserves has increased 43,2 million TRY and reached to 560,7 Million TRY, while it was 517,5 million TRY as of end of the May 2007. Capital and reserves for all groups of the banks (public, private and foreign banks branches) has increased and realized as 5,03%, 7,07% and 11,90% respectively.
